

2015 CAPACITY BUILDING PROJECTS

Project ID	561547-EPP-1-2015-1-IL-EPPKA2-CBHE-JP
Project Type	Joint Projects
Target Country	GE, IL
Title	Developing programs for Access of disadvantaged groups of people and Regions to higher Education
Priority	Modernisation of governance, management and functioning of HEIs
Description	DARE will improve the access to and quality of inclusive higher education for minority ethnic groups, women in disadvantaged situations and in peripheral areas and disabled students in IL and GE by supporting institutional capacities through the reinforcement and provision of student support services at GE and IL partner HEIs in four main areas (child care, clinical and occupational psychological, learning and physical disabilities, academic support) and delivering a regulatory policy framework
Duration	36 month

Action Research to Innovate Science Teaching & Career Orientation

DESCRIPTION:	Science and technology are in the heart of every modern society. Responsible investment in science and engineering is needed for raising wealth and sustainable development of our future. That is why all programme and partner countries need citizens that are scientifically literate for societal participation concerning questions of science, technology and the environment. All countries also need a substantial part of the young generation to be interested, motivated and well prepared to embark in careers in science and engineering. The project Action Research to Innovate Science Teaching & Career Orientation (ARTIST) wants to contribute to these goals by improving science education and career orientation for the young generation. This shall be done by investing in the skills of science teachers concerning the evidence-based innovation of science teaching and promotion of career orientation. ARTIST intends to improve science education by promoting teacher skills in doing action research and small-scale innovation studies in science education in programme and partner countries across Europe and Asia.

Promoting Migration Studies in Higher Education

DESCRIPTION: The project is based on the already well established good practice of consortium member institutions working together in prior EC funded project under TEMPUS Programme (517002 - UNIMIG). As a result of successful accomplishment of previous Tempus project consortium member institutions decided to bring gained experience to build capacities in Afghanistan for Kabul and Tabesh Universities, by curriculum development, deepening international relations capacity, improving the quality of education and teaching by adding migration related challenges faced by Afghanistan into the teaching schemes of partner country institutions and vice versa. These goals and aims are in full compliance with the regional and national priorities being defined as such for partner country institutions.

Using well established practice of establishment of MA programs in migration studies within South Caucasus region to enhance the development of the similar MA program in Afghanistan for ensuring that Afghanistani Universities are capable to offer curricula/education and research in the field of migration should be identified as wider objective of the project.

Specific objective of the project is to bring MA program in Migration studies in two Universities in Afghanistan into operation for the very first time. For effective administration of MA program in migration studies the project will establish Migration Competence Centre at Kabul University able to become a hub of cooperation between academic, research and public institutions.

University-enterprise cooperation via spin-off companies network

DESCRIPTION: The project is designed to define clearly the mechanisms of transfer and commercialization of knowledge and technologies, which are to be understandable unambiguously and executable within the reasonable timeframes. Realization of the project will enable to eliminate the existing difficulties and bottlenecks in cooperation with enterprises, to make structure of the cooperation more clear and robust and to give new opportunities and open new work horizons.

The project is aimed to bring cooperation quality to a new level, to improve it and to enlarge. It means that new communicative, scientific and business links will be established between the enterprises and HEIs.

The cooperation to be improved for the following groups: students, teaching and administrative staff of the university and the enterprise. The changes are to be executed at the level of the consortium and to be applied to all the participants. The cooperation for the abovementioned groups will be realized in the forms of internships, workshops, meetings, conferences and round tables.

The wider objective is promoting Bologna process implementation through enhancing university-enterprise cooperation via spin-off companies best practices.

Specific objectives are the following:

1. Development of effective SOC-Model for university-enterprise partnership and piloting in RF and Georgia HEIs.
2. Creating of virtual international spin-off network.

Assisting Better Communication

DESCRIPTION: Project "ABC – Assisting Better Communication" aims to enhance the profession of Speech and Language Therapy in participating countries through quality courses and programs offered at different levels of professional education.

Nearly 90% of children having risk of disabilities need language and speech therapy. Language and speech therapy is necessary for children and adults having problems of sucking/swallowing and problems of oral sensory. Those who suffer from difficulties of communication and speech - include people with a wide range of disorders of the general communication and speech autism, Down syndrome, cerebral palsy and other chronic conditions. SL therapy is important for children having articulation and speech problems, crucial for persons with hearing impairment etc. Thus, the language and speech therapy is a very important specialization, which assists people with special communicational needs.

During last 10 years the need for Speech and Language Therapy services has become more and more evident due to the progressive awareness of communication, speech and language related disabilities both in children and adults. In most cases these clients are being served by persons with no qualification in Speech and Language Therapy – they are from different related disciplines, such as linguistics, education and/or psychology, which cannot assure the quality of the speech and language therapy services.

Development of modern European standards-based specialty in Communication, Language and Speech Therapy will respond to the increased needs of quality services in the participating countries (Israel, Georgia, and Bosnia & Herzegovina).

Sustainable learner-centred Teaching - Advanced Recourse for Georgia and China

DESCRIPTION: The project aims to address the shortcomings in higher education across Georgia and China by systematically engaging HEIs in new practices with a learner-centred focus. More specifically, the project aims to achieve this by building capacity at PC institutions for implementing learner-centred teaching, raising awareness about learner-centred learning in PC institutions and in society at large and creating a basis for cooperation through international network for exchange of experience.

The project results will be used by the project participants, primarily from partner countries.

At the university level it reaches out to partner universities, its academic and administrative staff. Partner universities, that will be involved in all the project activities aimed towards manual development, formation of CPD units, teacher and administrative staff training and exploitation of project results throughout the universities.

At national level, other partner country universities will benefit from attending the interim and final conferences within the project aimed to inform the stakeholders about the project achievements and introduce them with the new manual on learner-centred approach. CPD units in each partner country university which will conduct regular workshops in learner-centred approach.

At international level, Chinese and Georgian partners will profit from European partners' expertise in developing partnerships for staff exchange that will promote continuous development of academic staff at partner countries. International network for exchange of experience will contribute to staff development.

Enhancing innovation competences and entrepreneurial skills in engineering education

DESCRIPTION: Armenia, Georgia, Belarus and Kazakhstan are currently facing economic difficulties as consequences of economic policy, recent international financial crisis, collapse of world oil/gas prices and economic slowdown in China and other emerging countries. The situation causes an urgent need to implement structural economic reform to transform traditional economy to diversified, knowledge-based and innovation-driven economy. However, present higher education in these countries does not have a strong link to innovation and entrepreneurship. It has failed to become the driving force to create new innovative enterprises which lead to new jobs and economic growth.

This project aims to enhance innovation competences and entrepreneurial skills in engineering education through university-business cooperation in order to support creation of new enterprises, new jobs and economic growth in the partner countries.

The specific objectives of the project are to:

- foster an innovation culture among partner university staff and students
- establish 8 innovation centers at partner countries
- provide training to 104 partner country staff on innovation and entrepreneurship
- introduce innovation pedagogy in teaching and learning
- define transversal innovation competences and develop tools to assess such competences
- introduce new courses on innovation and entrepreneurship to engineering students
- promote university-business cooperation
- provide business incubator and start-up accelerator services to staff and students to develop successful businesses
- organize an innovation competition to promote entrepreneurship
- disseminate project results to other universities in the partner countries
- help partner countries to develop a national innovation strategy

Educational for Drone

DESCRIPTION: The aim of eDrone proposal is to define a learning environment to deliver more opportunities to access new competences related to the use of drone technologies in professional activities. These new competences refer in particular to the use of advanced ICT solutions for the use of drones and of the data acquired through drones that may go a long way towards the goals and priorities in terms of optimization of the professional competences, that have already been stated in the Social- economic Development Strategy 2020 of all the Partner Countries, and in terms of creating new job opportunities, especially for youth that is strongly encouraged by Europe 2020 strategy as stated in the European Commission Communication “Youth on the Move”. The use of drones by professionals will open new scenarios requiring practical and theoretical knowledge that are beyond the simple driving and maintenance of drones. The main objective of the eDrone project is to provide higher education institutions in the Partner Countries with effective and efficient instruments to setup Offices for Education for Drones (OED), for the transferring of all the above mentioned knowledges to professionals of each Partner Country. Moreover, the project aims at realizing an innovative ICT-based infrastructure employing enhanced technologies and methodologies allowing all the Partner Countries to create a network for sharing educational contents and databases to professionals. Such infrastructure will be used to support OED in the technological and scientific transfer to professionals. The Programme Countries will transfer their know-how and expertise for the achievement of the eDrone objectives by training the future teachers of the OED and by supporting them in the first edition of the OED.

Paving the way to interregional mobility and ensuring relevance, quality and equity of access

DESCRIPTION:	<p>In the last years, with the contribution of European Cooperation Programmes, the EHEA became a reference point for policy dialogue between the EU and several regions of the world on higher education and its key role for employability of graduates. The growing global dimension of education, needs further actions for the enhancement of exchanges between the EHEA and other parts of the world, sharing goals and principles, as the transparent recognition of studies and qualifications. The recent acceleration of mobility between EHEA and other regions through the EM programme put a renewed and global perspective of “mobility” which showed the huge challenges that HE institutions and systems still need to face and manage. The students participating to EM projects are experimenting the same problems in recognition of studies abroad, that EU students and institutions had to afford at the first stage of Erasmus mobility.</p> <p>The project proposal intends to harmonise the credit allocation and grading system in 5 study areas jointly developed in previous projects in 23 institutions from 8 countries belonging to 4 different regions, besides EU, providing a reliable scheme for credit and grades transfer, and is based on previous experiences of the partnership in TEMPUS Programme in CA, Caucasus, Russia and Asia and EMA2 projects in the same regions, and on the new ECTS Guide and pilot project EGRACONS.</p>

2017 CAPACITY BUILDING PROJECTS

585587-EPP-1-2017-1-IL-EPPKA2-CBHE-JP

Assessment Tools for new learning environments in higher education institutions

DESCRIPTION: Curriculum reform programs have been central to European Commission's TEMPUS and ERASMUS programs. Although assessment of the courses was included in these programs, none offered to develop relevant innovative tools and methods to evaluate these new innovative student-centered courses. Moreover with relation to the formative assessment (FA) essential tenet needed in these environments, these projects have pointed to a growing need to deepen the knowledge of faculty regarding the optimal design and implementation of assessment in general and FA in particular. The ASSET consortium provides the knowledge and pedagogical expertise aimed at developing and piloting creative and innovative course assessment tools (CATs) and methods adapted to the learning environments in use, and improving the effectiveness of teaching and learning within the IL and GEHE system, thus, bridging the gap between current educational goals of teaching and learning, and assessment processes for the 21st century. The proposed ASSET project will develop IL and GE faculty skills in planning, preparing, producing, and integrating CATs in their courses including ICT-based virtual environments, by organizing training workshops for professional development, providing an ongoing support to further the sustainability of FA implementation, and disseminate the set CATs in their HEIs and beyond. The development of CATs will allow partner HEIs evaluating students' lifelong learning (LLL) skills, both in personal and social levels. Moreover, ASSET proposal is of relevance to the labor market and certainly offers flexibility when taking into account issues of lifelong learning, non-traditional learning, and other forms of nonformal educational experiences, in contrast to the SA approach. The project will raise the quality and relevance of the teaching/learning experience and thus education at large, in line with the student-centered approach that lies at the core of the Bologna process.

Change in Classroom: Promoting Innovative Teaching & Learning to Enhance Student Learning Experience in Eastern Partnership Countries

DESCRIPTION: The aims of this project are:

- To enhance student learning experience in PCs in accordance with the ET 2020 objectives by promoting development and innovation in T&L, supporting integration of technology & research, and dissemination of good practice
- To modernize HE in the PCs in line with Bologna agenda and to establish cooperation in education & training between EU & PCs and amongst PCs by promoting virtual mobility of teachers & students, and enhancing lifelong learning resources & means

These aims will be achieved through completion of the following objectives:

- To strengthen Teaching Staff Development Centres (TSDC)
- To build up capacities of PC HEIs' teaching staff
- To establish a Virtual Academy of Teaching & Learning (VATL)
- To promote greater awareness on innovative & technology-enhanced T&L

About 30 staff & 100 trainers will be trained on innovative T&L methods and ICT-based interactive and e-learning technologies for TSDCs. 28 technology-enhanced teacher training (TET) classrooms, 9 multimedia content building studios, other e-learning facilities and 5 new TET courses will be set up in PC HEIs.

The project places a strong emphasis on the capacity building of a wide cohort of teaching staff in PC HEIs by utilizing a multiplier effect via "train the trainer" initiative. The trained trainers will adapt & deliver newly developed TET courses to over 530 university teachers.

The project will provide PCs' HE communities with an interactive professional communication, mutual learning and virtual mobility platform & Open Educational Resources - the VATL, to promote innovative T&L practices and continuous development of teaching staff.

As a result of the project implementation 6 virtual VATL's communities of teaching practice around particular teaching approaches & disciplinary groups, an annual virtual forum on innovative T&L, as well as internal institutional incentives will be established to promote awareness on innovative pedagogy and excellence in T&L.

Master in Smart Transport and Logistics for Cities

DESCRIPTION: The analysis carried out in cooperation with Local Universities(LU), city and national authorities, stakeholders, during ah-hoc meetings, highlighted the need to improve transport services in Georgia (GE)and Ukraine(UA),benefiting of the new opportunities offered by telematics.But a lack of experience on planning, management and control of these services emerged inGE&UA,also due to inadequate academic paths for supporting exploitation and dissemination of smart transport culture, including the limits of their research and their limited international relationships.Then, SmaLog aims to transfer to GE&UA the most recent knowledge and good practices developed within the European Countries in the field of smart urban transport and logistics, holding the challenges supplied by new technologies. LUs are the key-actors to start and consolidate this process.

Therefore, the proposal aims to:

- develop and test in GE&UA 2-year University Masters(120ECTS),both for Engineering and Economics faculties;
- support LU in defining and delivering the Masters;
- support the implementation in LU laboratories dedicated to smart urban transport;
- disseminate through the newsletters, events, workshops, seminars the importance of research in urban transport and logistics exploiting the new technologies;
- set up national coordinated networks of UNIs, public bodies, private companies and NGOs involving them in the wider European network of research centres on smart urban transport and logistics.

These aims will be achieved thanks to a mix of activities such as: education, training, conferences and public events, web based dissemination and exploitation activities.The main outputs are:

- masters in smart transport and logistics for cities formally approved(EU-GE/UA double-joint degree);
- internationalization of research on smart transport and logistics for cities;
- urban smart transport and logistics networks in GEandUA;
- implementation of local laboratories on urban smart transport and logistics.

Academic Integrity for Quality Teaching and Learning in Higher Education Institutions in Georgia (INTEGRITY)

DESCRIPTION: (INTEGRITY) is a National SM initiative with the core objective to enhance the quality of teaching and learning processes that are based on the principles of academic integrity, supported by policies, mechanisms and tools that help prevent and detect cases of plagiarism in higher education institutions in Georgia.

Specific objectives:

1. To introduce Plagiarism Detection & Prevention/Feedback Instrument in Georgian universities, integrated into the existing Learning Management System (LMS);
2. To Design & Launch PR Campaign of Plagiarism Awareness in Georgian HEIs targeting both students and faculty/teaching staff;
3. To Develop & Deliver Faculty/teaching Staff Training in the area of Effective TLA;
4. To Develop & Enhance Student Services to Boost their Academic Skills;
5. To Review Academic Writing Curriculum at all 3 levels of Studies against standards and requirements established in the EU;
6. To develop University Policies and Resources that are conducive to quality teaching & learning based on the principles of academic integrity.

The relevance of this initiative is as follows:

- a) Georgian HEIs are urged to respond to the external quality measures emphasizing regulation of Plagiarism;
- b) The National Research Report- 'The Problem of Plagiarism and Its Perceptions in Georgia' (2016) that revealed many critical issues to design intervention measures;
- c) The needs assessment of GE HEIs that was conducted in December 2016 by ISU QA Office boosting relevance
- d) Georgian HEIs actively attempt to align their teaching and learning processes with the EU HE Standards;
- e) The successful case of piloting advanced Technology tools (Turnitin and Moodle) at ISU transferring knowledge to other partners.

The INTEGRITY program has meaningful impact at the individual (min 60,000 students, 80 admin staff, 300 academic), institutional (12 GE HEIs), sector (transferable to the entire HE sector) and society levels (changing perceptions with regards to academic integrity).

Improving skills in laboratory practice for agro-food specialists in eastern Europe

DESCRIPTION: The project is foreseen for 36 months. Its activities are aimed to creation of specialized courses dedicated to laboratory practice for specialists of agro-food sector. Four specialized courses will be created at faculties: veterinary medicine, agronomy, animal husbandry and food technologies. One transversal course will be developed as well. The courses will be also developed for the post-diploma training.

Project activities include: Consultations, round tables for definition of needed competences.; Elaboration of references for specialization "laboratory practice" in collaboration between HEIs and laboratories.;

Elaboration of curricular and training plans: Elaboration of special courses for post-diploma courses; Students mobility among partner and programme institution. For this teachers teams will be created. Universities teachers and laboratory specialists will be members of these teams; their training will be done through six training sessions in EU and in partner countries; Pilot courses will be launched; At every faculty the group specialized on laboratory practice will be created

-Creation of pedagogic support: guides, manuals, films, e-learning. The MOODLE platform for distance learning will be used for launching distance courses. The organizational innovation hub Lab TECH for coordination of innovative academic and post-diploma training will be created. The tools for collaborative teaching between universities and laboratories will be implemented.

Title	Boosting the role of HEIs in the industrial transformation towards the Industry 4.0 paradigm in Georgia and Ukraine - HEIn4
Project Start Date	15-Jan-2020 - 14-Jan-2023
Specific Activity	Strengthening of relations between HEIs and the wider economic and social environment
Project Aims	Substantially obsolete industrial infrastructure in Georgia and Ukraine poses existential challenge for these countries' economies under conditions of global transformation, often referred to as 4th Industrial Revolution. The gap between availability of advanced technologies coupled with ubiquity of information on the one side and lack of experience in re-setting of business models for an enterprise in Georgia and Ukraine on the other side is bridged in HEIn4 via reinforcing the role of HEIs in Industrial transition through: - building capacities in HEIs (human resource and institutional units); - delivery of tailored business management courses for industrial personnel; - launching consultancy services for industrial companies (large and SME); - setting new taught modules for Master students. - establishing of new forms of collaboration between HEIs and industry.

Title	Role of Universities in the Regional Development - RURD
Project Start Date	15-Nov-2019 - 14-Nov-2021
Specific Activity	Modernisation of policies, governance and management of higher education systems
Project Aims	<p>The aim of the project is to make Georgian regional HEIs more relevant to the communities and regions they are located and to serve as a basis for regional development.</p> <p>Mission and Strategy of Regional Universities will be developed in compliance with regional needs. The project will support the network of Regional Universities in planning and development of relevant strategy and mission.</p> <p>Involvement of the Universities in the development of Regional Strategy will increase. Close collaboration with local authorities and other social partners will take place. Cooperation with EU universities and sharing their experience will introduce the best practices that will improve and modernize management structures in universities and will make their administrative structures compatible with those of the European universities. Changes in management at institutional level will raise productivity of the university administration management that will in its turn have an impact on creation of new regional policy.</p>

Title	Educating Science Teachers for All - ESTA
Project Start Date	15-Jan-2020 – 14-Jan-2023
Specific Activity	Curriculum development
Project Aims	<p>ESTA aims to improve the quality of Higher Education professional development of university science teacher educators' staff towards teaching diverse sensitive methods in their courses. Thus, courses on diversity sensitive science teaching will be implemented in Georgia, the Philippines, and Bosnia and Herzegovina. Starting from the needs analysis linguistic and cultural diversity is major focus here. In phase one, preparation will be done by Academic Staff Tour of Partner institutions in Program Countries. Second phase is development of courses following Action Research and CLIL (Content and Language Integrated Learning) approach, their implementation and evaluation.</p> <p>Innovative here is the interdisciplinary development of the courses, where educators from science disciplines develop their teaching methods cooperatively with educators from language, general pedagogy and intercultural education departments. Thus, different competences and skills will be combined. Both pre- and in-service teachers should be reached by the courses and the knowledge and skills about diversity science teaching should be shared. Following new teaching and learning materials for diverse science classes will be developed and implemented. This aims improving learning outcomes. Developed courses will be implemented at the partner institutions and promoted at the regional and national level among decision makers and policy makers. All new teaching and learning as well training materials will be offered at the ESTA website in the meaning of OER and will be evaluable not only to the participants of the courses but also to other interested pre- and in-service science teachers. Thus, possibilities of internationalization and networking is given.</p>

Title	Learning Optmization and Academic Inclusion Via Equitative Distance Teaching and Learning - LOVEd
Project Start Date	15-Jan.2020 - 14-Jan.-2023
Specific Activity	Modernisation of governance, management and functioning of HEIs
Project Aims	LOVEDISTANCE project foresees to improve the access to and quality of inclusive higher education for minority ethnic groups, women in disadvantaged situations and in peripheral areas and disabled students in Israel and Georgia by supporting institutional capacities through the reinforcement and provision of student support services in both countries. The project also aims to enhance the access to education within and outside the classroom throughout a digital environment. Herein, courses already developed within the context of reinforcing the academic skills of target groups will be more accessible. The project reflects the importance to raise awareness on accessibility issues within Israel and Georgia as well as the necessity to ensure the long-term effect impact of the project for the benefit of women in vulnerable situation and minority ethnic groups.

Title	Setting peer review instruments and goals for medical (HEALTH) Education - HEALTH
Project Start Date	15-Nov-2019 - 14-Nov-2022
Specific Activity	Modernization of governance, management and functioning of HEIs
Project Aims	<p>The ultimate goal of this project is to enhance quality of medical/health education in the countries of Eastern Partnership (Georgia, Moldova, Belarus) and Central Asia (Kazakhstan, Tajikistan) through setting instruments and goals of peer review. 12 institutions in 5 partner countries will take an advantage of knowledge and expertise share from 2 institutions from Bulgaria and Lithuania. The relative uniformity of problems in higher medical/health education in partner countries are derived from the common past.</p> <p>The project will ensure that the achieved results are sustainable and being exploited in the foreseeable future by establishing the above mentioned journal and an independent cross-national Peer Review Association for Medical/Health Education of Eastern Europe and Central Asia (PRAMED-EECA) aimed at:</p> <ul style="list-style-type: none"> a. Providing a pool of highly qualified and readily available peer reviewers; and b. Assisting medical schools in the targeted regions in effectively preparing for international accreditation.
